## **DETAILED ACTION**

### ***Response to Amendment***

1. This is in response to the amendment filed on 27 September 2004, in which claims 1-12, 28-33 and 35-37 remain pending for examination.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, 28-33 and 35, drawn to a method for capturing and distributing memories of a deceased individual, comprising the steps of providing an electronic storage memory database that can be accessed over a communication network for displaying at east two separate web sites for said deceased individual, classified in class 707, subclass 10.

- II. Claims 36 and 37, drawn to a software product such that when loaded onto a computer it would cause the computer to do the following steps providing pre-authorization for selected individual for accessing said database, classified in class 707, subclass 9.

The inventions are distinct, each from the other because of the following reasons:

Invention listed Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. The subcombinations are distinct from

Art Unit: 2162

each other if they are shown to be separately usable. In the instant case, invention has separate utility as follow.

Group I. A method for capturing and distributing memories of a deceased individual, comprising the steps of providing an electronic storage memory database that can be accessed over a communication network for displaying at east two separate web sites for said deceased individual.

Group II. A software product such that when loaded onto a computer it would cause the computer to do the following steps providing pre-authorization for selected individual for accessing said database.

See MPEP § 806.05(d).

Because these inventions are distinct for the reasons give above and have acquired a separate status in the art as shown by their different classifications, restriction for examination purposes is proper.

Because these invention are distinct for the reasons given above and the search for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2162

Applicant(s) are reminded that upon the cancellation of claims to a non-elected invention the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2162
